

Grundfos CR Series Pump

The CR series pump is a non-self priming, vertical multistage centrifugal pump.

The CR series pump is a non-self priming, vertical multistage centrifugal pump. The in-line design enables the pump to be installed in a horizontal pipe system. The Grundfos CR in-line pump provides a more compact design. The pumps consist of optimized hydraulics, and various materials of construction to handle pumped liquids. The CR pump is used in heating systems, pressure boosting, water treatment and commercial/industrial applications.
