microlene[®]

purified water

the easiest way
to clean,
healthy water

UNDERBENCH DRINKING WATER PURIFIERS

Thousands of people all over Australia and New Zealand depend on Microlene purified water.

microlene[®] purified water for TOWN WATER Multi barrier purification

- 1 Medical Grade Polypropylene Filter Discs offer barrier protection by blocking particles 10 micron and larger, reducing sediment, rust, and algae.
- 2 KDF purification media reduces chlorine, iron, hydrogen sulphide, heavy metals, and bacteria from your water. KDF also reduces the load on the activated carbon, allowing it to reduce odours and improve taste.
- 3 Granular Activated Carbon (GAC)
- 4 Medical Grade Polypropylene Filter Disc offers barrier protection by blocking particles 1 micron and larger, reducing asbestos fibres, and parasitic cysts such as giardia, and cryptosporidium.

microlene[®] purified water for RAIN WATER Multi barrier purification

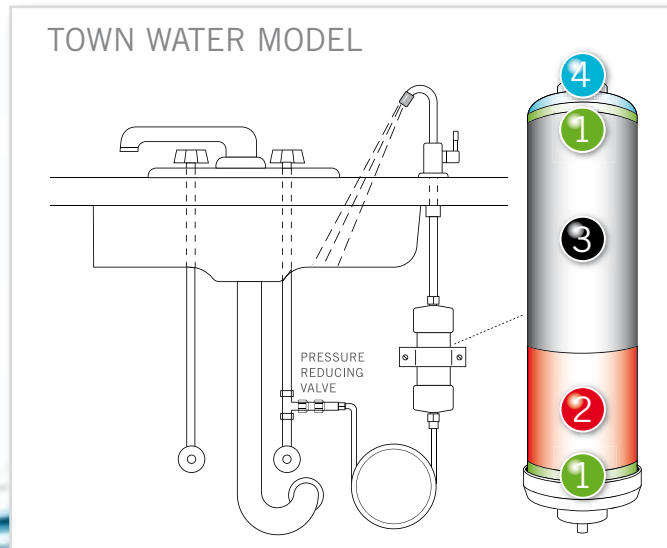

- 1 Medical Grade Polypropylene Filter Discs offer barrier protection by blocking particles 10 micron and larger, reducing sediment, rust, and algae.
- 3 Granular Activated Carbon (GAC) traps contaminants on its very large surface area in a process called adsorption. GAC is particularly effective in reducing volatile chemicals including: pesticides, free chlorine, VOC's and THM's. All Microlene GAC is silver ion impregnated to limit biological growth within the purifier. EPA Reg No. 37589
- 4 Medical Grade Polypropylene Filter Disc offers barrier protection by blocking particles 1 micron and larger, reducing asbestos fibres, and parasitic cysts such as giardia, and cryptosporidium.

TOWN WATER – most tap water supplies contain chlorine and aluminum used to treat the water. Some supplies can have old pipes containing lead, rust and asbestos, therefore the water may not be healthy for your family.

RAIN WATER – from your roof is exposed to animals, dust and a variety of micro organisms that can effect the taste and safety of your water.

microlene[®] purified water PURIFIERS - reduce unwanted contaminants including: chlorine, pesticides, sulphur, sediment, rust, algae, odours, asbestos, aluminum[†], lead[†], and also filter cysts such as giardia and cryptosporidium*.
